Powered Bluetooth® stereo speaker with built-in subwoofer

HIGHLIGHTS

- Fully-fledged hifi sound from an elegant and compact stereo speaker system with state-of-the-art Bluetooth® wireless technology
- Integrated high-performance digital amplifier with digital signal processor (DSP); no additional amplifier is required
- Genuine two-way stereo system at the front with fabric domes and Heco paper cone midrange drivers
- Built-in subwoofer with an aerodynamically shaped reflex port for a powerful bass range and high level stability
- Elegant design in a black or white high-gloss finish with removable ‚floating‘ front grille and an embedded metal insert with engraved HECO logo
- The latest high-end Bluetooth® 4.0 standard „aptX®“ ensures the transmission of CD-quality music
- Additional analogue stereo input (3.5 mm jack) for connecting additional devices such as MP3 players, CD players, TVs, etc.
- Four DSP-controlled sound programmes for all music genres (Linear, Rock, Ambient, Vocal)
- Complete control is ensured via the supplied high gloss, clearly laid out remote control (incl. battery)
- USB charging socket for smartphones, tablets and other mobile devices (5V, 2.1A max)

TECHNOLOGY

- A powerful 13 cm front-firing long-throw subwoofer driver with aerodynamically shaped reflex port
- Two 92 mm HECO paper cone midrange speakers in an enclosed housing
- Two 20 mm fabric domes with maximum spacing for an optimum stereo image
- Extremely compact digital three-channel high-power amplifier with Bluetooth® functionality and an analogue stereo input
- Sturdy, high-gloss MDF housing with an embedded metal insert and ‚floating‘ fabric grille
