

Bose Soundbar 700

Don't just listen. Feel every moment.

You don't just want to hear your movies, music and TV. You want to feel the crushing footsteps of a T-Rex on the screen, the roar of the crowd when the underdogs win the match and the heart-pumping, beat-stomping chorus in your favourite song. That's why we set out to design the world's best soundbar, the Bose Soundbar 700.

Featuring an unmatched combination of sophisticated design and exceptional sound, this slim soundbar is packed with technologies that bring out the full power in every moment of your entertainment. And with built-in voice control from the Google Assistant and Alexa, all your music is at the tip of your tongue. But it's not just about the sound—it's about the experience. So, come and visit us to hear it for yourself.

Built in voice control

With the Google Assistant and Amazon Alexa built right into the Bose Soundbar 700, you can control your music, get information and manage your day without lifting a finger.* Just choose your voice assistant to start listening. But what good is voice control if the soundbar can't hear you? Experience superior voice pickup from a custom-designed eight-microphone array that will still hear you, no matter how loud your music is. And an ingenious light bar will help visually indicate when your voice assistant is listening, thinking or speaking. Plus, it just keeps on getting better. Future software updates will unlock new features.

Looks as good as it sounds

Featuring a tempered glass top, wrap-around metal grille, clean lines and an exquisite finish, the Bose Soundbar 700 is just as beautiful on the outside as it is on the inside. Place the soundbar on the TV stand or mount it elegantly on the wall. Either way, it's pleasing to the eye and ear.

One remote is all you need

Tired of trying to figure out which remote goes with which device? We get that. So we designed a remote you'll actually want to use. The Bose Soundbar 700 Universal Remote is included with the purchase of your soundbar and lets you manage all your entertainment at the touch of a button. It features six presets and lights up only the buttons you need at that moment, making it even easier to find your favourites.

Music. Any way you want it.

When it comes to what you want to hear, you have so many options. With Wi-Fi®, Bluetooth® and Apple AirPlay 2 compatibility, you can wirelessly stream whatever you want, however you want. Browse your favourite music services, like Spotify®, Amazon Music or Apple Music, or play anything from your phone or tablet. If you can get it on your device, you can hear it through the Bose Soundbar 700. Music services may vary.

Take control of your listening experience

With the [Bose Music app](#), you can easily browse through all your music in one place and seamlessly jump between stations, playlists and services. Plus, it's another simple way to control the Bose Soundbar 700. Setting up presets with the app is easy, so the music you love is just one touch away. And multiple users can personalise their own experience and content. Plus, the app makes setup simple by walking you through each step.

MORE BASS

ADD THE BOSE BASS MODULE 700
