High Sound Quality

Enhanced Realism and Immersion from Any Content

As the world's first sound bar with DTS Virtual:X®, the YAS-207 can *virtualize* immersive 3D surround sound, simulating sound effects that move around and even above the listener. While DTS Virtual:X produces the most convincing envelopment from content designed in object-based immersive formats, such as DTS:X™ or Dolby Atmos®, it also works its magic on any multichannel or stereo content, upmixing non-immersive soundtracks to create more lifelike, spacious sound for all of your favorite TV shows, movies, games and music.

**DTS Virtual:X will be available via a firmware update August 2017.*

Dynamic, Clear Sound

The YAS-207 center unit includes four 1-3/4" woofer units and two 1" tweeter units. Its cabinet capacity is optimized to improve sound quality — delivering dynamic, clear sound for an immersive listening experience that brings your TV/video content to life.

4 Woofers 2 Tweeters

Ready to Rumble. When You Are.

When it's time for movie night or for pumping jams for a party, the YAS-207 is ready. Its powerful subwoofer delivers deep, impactful bass that you can feel. And it's wireless, so you can place it anywhere in the room. The included remote control lets you adjust the subwoofer level, so *you* can decide when it's all about that bass.

Hard to Hear the Dialogue? Missing the Details?

No more. If you've been relying on your TV's built-in speakers, you know just how muddled they can sound. With six speaker drivers and an acoustically-engineered cabinet, the YAS-207 delivers dynamic, exceptionally-clear sound that lets you hear all of the details you've been missing. It also features a special Clear Voice mode that brings dialogue and narration to the forefront, making voices more intelligible.

Beautiful Design, Distinctive Presence

Stylish Simplicity

Striking the perfect balance between beauty and function, this sound bar features a slim, understated design that complements your TV while offering easily accessible touch-sensitive buttons and discreet LED indicators that make it a pleasure to operate.

Tabletop, Shelf Top or Wall Mount. The Choice is Yours.

Only 2-3/8" high, the YAS-207 sound bar fits in front of almost any TV without obstructing the screen image, or it can be placed on a lower shelf of a TV stand. It also has built-in keyholes and comes with a mounting template in the box, making it easy to wall mount if desired.

Bluetooth® Made Better

Stream your favorite music from your mobile devices via *Bluetooth* with surprising sound quality. The YAS-207 automatically enhances the high-end of compressed music sources and deepens the mid- to low-ranges, giving you a more vivid and warm sound quality approaching the original.

Easy to Use

There's an App for It

If your smartphone or tablet is always nearby, you'll want to check out the free, downloadable Home Theater Controller app. It gives you smart operability of the YAS-207 in a beautiful and intuitive design. It also does more, providing access to settings beyond what is available from the included remote control.

Three Ways to Stay in Control

It's nice to have choices. The YAS-207 comes with a dedicated remote control in the box or it can be controlled with a free, downloadable app for Apple® iOS and Android™ devices. If your TV is compatible with HDMI-CEC and you use separately-sold HDMI cables to hook it up, you can turn the power on and off, switch inputs, adjust the volume and easily perform other operations by using your existing TV remote.
