

## A roomful of sound, a world of wireless music.

There's a lot to love about TV shows and movies. Especially the sound. With the SoundTouch® 130 home theater system, the 37" soundbar delivers clear, spacious sound all across your room, while the wireless Acoustimass® module provides impactful bass. It's also a powerful music system, letting you easily enjoy wireless music when connected to your existing home Wi-Fi® network or *Bluetooth*® devices.

- Clear, spacious sound from our best-performing soundbar
- Small control console with 4 HDMI® inputs ensures the highest-quality sound from your components
- Wirelessly play music services like Spotify® and Pandora®, Internet radio stations and your stored music library
- Flexmount® technology ensures optimal performance whether soundbar is placed on a table or wall mounted
- Customizes sound to fit your room for a consistent, high-quality performance

### The science behind the sound

On the surface—or on the wall—it looks beautiful. But the technology packed inside the enclosure is what makes this soundbar truly shine. Six precisely positioned drivers and two PhaseGuide sound radiators deliver detailed sound throughout the room. Strong dialogue from the center, compelling effects from the left and right. All told, it's an immersive performance that extends well beyond the speaker's physical size to bring out the best in your movies, music and sports.

### **Notable bass performance**

The wireless Acoustimass module adds dramatic low notes to your entertainment—without adding a cable connection from the module to the speaker. With a signal range of 30', you can place it pretty much anywhere in the room. Even if hidden from view, you'll notice the extra level of realism it provides, from clashes at the line of scrimmage to a stadium crowd rising as one.

### **Sound designed for your room**

Wood floors, plush rugs, unique room dimensions. Believe it or not, they can all affect sound. That's where the ADAPTiQ® audio calibration system comes in. It adjusts the speaker's performance to the acoustics of your room, so you don't have to change a thing. Once you've placed your speaker, just run the ADAPTiQ system and enjoy consistent performance throughout the room from then on.

### **Exploring music with SoundTouch®**

With SoundTouch®, you can discover and enjoy music more effortlessly than ever before. Wirelessly stream millions of songs through Spotify, Pandora, iHeartRadio™ and Deezer, as well as Internet radio stations and your own music library. A powerful app lets you control your music from

anywhere in the house with your phone or tablet. And six easily programmable presets let you play your favorite music from the app or the included universal RF remote.
