

Bose Soundbar 500

Ultra-high performance with an ultra-thin design

This stylish soundbar is meant to be heard, not seen. That's why we engineered custom-designed drivers to keep the Bose Soundbar 500 almost impossibly thin, without taking away from the acoustic excellence Bose is known for. Measuring only 5 centimetres high, its profile fits discreetly under your TV screen, so you won't even know it's there—until you hear it. And with the Google Assistant and Amazon Alexa built-in, you won't have to lift a finger. Like the Bose Soundbar 500, it's the little things that make a big difference. It may be our thinnest soundbar yet, but its powerful acoustics fill the entire room with sound you just have to hear to believe. Come and visit us to experience it for yourself.

Built in voice control

With the Google Assistant and Amazon Alexa built right into the Bose Soundbar 500, you can control your music, get information, manage your day and so much more*—all without lifting a finger. Just choose your voice assistant to start listening. But what good is voice control if the soundbar can't hear you? Experience superior voice pickup from a custom-designed eight-microphone array that will still hear you, no matter how loud your music is. And an ingenious light bar will help visually indicate when the soundbar is listening, thinking or speaking. Plus, it just keeps on getting better. Future software updates will unlock new features.

Music. Any way you want it.

When it comes to what you want to hear, you have so many options. With Wi-Fi, Bluetooth® and Apple AirPlay 2 compatibility, you can wirelessly stream whatever you want, however you want. Browse your favourite music services, like Spotify®, Amazon Music or Apple Music, or play anything from your phone or tablet. If you can get it on your device, you can hear it through the Bose Soundbar 500. Music services may vary.

Take control of your listening experience

With the [Bose Music app](#), you can easily browse through all your music in one place and seamlessly jump between stations, playlists and services. Plus, it's another simple way to control the Bose Soundbar 500. Setting up presets with the app is easy, so the music you love is just one touch away. And multiple users can personalise their experience and content. Plus, the app makes setup simple by walking you through each step.

MORE BASS

ADD THE BOSE BASS MODULE 500
