

S-71 130W 3-Way Floorstanding Speakers with Concentric Medium/Tweeter Driver (Series 7)

[Print page](#) | [Home](#) | [back](#)

Your complete high-end solution.

Designers and engineers at our Research & Development centres in Paris and Tokyo – the same responsible for our **EX and Series 8 speakers** – have pooled their expertise to bring you the Series 7 speaker range: a **perfect balance** between design and acoustic performance.

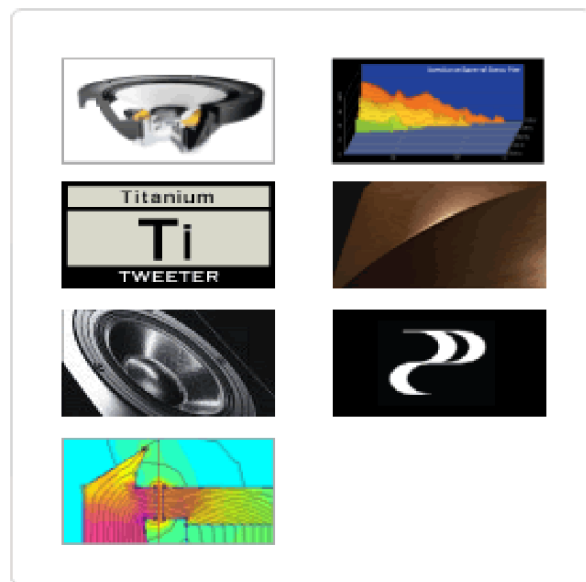

The **complete series** includes **floorstanding, bookshelf and centre speakers**, with a dedicated multi-channel **subwoofer** completing the line-up.

The 3-way S-71 features one concentric driver with **Titanium dome tweeter**, an aramid cone midrange and two **13cm aramid cone woofers**. The result is an extremely smooth and aligned sound.

Thanks to the unique ABD/AFast standing wave control technologies, the **standing waves** inside the speaker enclosure are eliminated without affecting the low frequency response. The S-71 also features a **bottom horn type bass-reflex port** that naturally enhances the sound pressure level of the low frequency range.

Three 'spikes' and pads at the base of the speaker ensure the **highest possible stability**. The **rigid cabinet** is constructed to minimise all external disturbances, protecting the integrity of the reproduced sound.

The result is an **accurate reproduction** of both sound image and sound field at the highest level.

Specifications

Woofer	2 x 13cm Aramid cones
Midrange	13cm concentric Aramid cone
Tweeter	2.5cm concentric Titanium dome
Enclosure	Bottom front vented bass-reflex floor-standing speaker
Impedance	6 Ω Ohm
Frequency Range	33 - 50.000 Hz Hz
Sensitivity (2.83V/1m)	85 dB dB
Maximum Power	130W W
Dimensions (W x H x D)	260 x 1.114 x 276 mm mm
Weight	23.8 kg kg
