

## D8

Wharfedale are proud to release a new series of active subwoofers. Utilising technology honed in the popular WH-S8 an WH-S10, the new D8 and D10 subwoofers are the perfect way of enhancing your stereo or home system to produce excellent low end performance

The cabinet construction of the new D8 has been aesthetically enhanced, with new high-gloss lacquered front baffles and cosmetically enhanced veneers. Not only is this a significant improvement, the new look is designed to match perfectly with the new and award winning Diamond 200 series, which is already gaining outstanding reviews internationally.

Aside from newly improved aesthetics, the two new subwoofers are built to elevate the performance of any AV setup. The D8 features an active flex subwoofer system in a vented box allowing it to pack speed, punch and excellent low frequency extension.

### Key Features

- Low pass filter slope continuously adjustable from 40Hz - 150Hz
- Phase invert switch
- Low frequency bass extension (below 30Hz), with a wide 86dB dynamic range
- Low level inputs, dedicated LFE input
- Auto power sensor

### Specification

Description/Format	Active Dynamic-Drive IB subwoofer system
Drive Units	1 x 8" (200mm) cone long-throw
Frequency Response (+/-3dB)	40Hz - 120Hz
Amplifier Power Output	70W
Peak Power Output	150W
Line Input Sensitivity	100mV for maximum output
Crossover Range	40Hz - 150Hz
Inputs	Stereo Line In (2 x RCA Phono) Mono (LFE) Line In (RCA Phono)
Signal-to-noise ratio (S/N)	85dB
Avg. Max Output @1m	105dB
Features	Low pass filter slope adjustment Phase inversion Auto on/off
Dimensions (H x W x D)	298mm + (30mm) x 268mm x 300mm (+22mm)
Net weight	7.5kg
Gross weight	9.1kg
Accessories	IEC power cord, spikes as standard
